simple expressions 67

simple primitive expressions 67

simplex method 56

SISAL 214

special actors 18

stages 36

static data flow graph model 17, 18,  
25, 26

static dataflow model 6

switch actor 19, 21, 22

synchronisation requirement 226

T-gate actor 19, 94, 205

tagged-token model 6

topological sort 46

two-level forall expression 140, 143,  
148, 152

unflattened array representation 79

unimodular matrix 56

unpacker subgraph 208

Val 11, 14, 62, 63, 65, 67, 70, 233

vectorization 5

vectorizing compiler 2

von Neumann bottleneck 2

weighted data flow graph 43

well-behaved data flow graph 25
