Index

A
Advanced glycation end products (AGEs), 30
Alzheimer's disease (AD), 2, 117, 118
  clinical diagnosis, 94–95
  incidence, 93
  late onset/sporadic AD (LOAD), 93
  management, 95
  pathogenesis
    amyloid β-peptide, 96
    brain amyloid accumulation, 97
    cytokines, 98
    genetic polymorphisms, 98
    inflammatory hypothesis, 97
    low-density lipoprotein receptor-related protein 1 (LRP1), 97
    peripheral inflammation, 98
    peripheral inflammatory mechanisms, 99–100
    senile plaques, 98
  and periodontitis
    bacteremia, 100
    cytokines and LPS, 101
    infection-induced effects, 101
    monocytes, 101
    RAGE production, 102
  prevalence, 93
American Academy of Periodontology (AAP), 6
American Association of Clinical Endocrinologists (AACE), 27
Aspiration pneumonia
  oral care
    chlorhexidine (CHX), 87
    edentulous patients, 88
    oral interventions, 87
  oral health
    nursing home residents, 87
    oral microflora, 86
Atherosclerosis, 2, 117, 118
Atherosclerotic vascular diseases (ASVD)
  ASVD and periodontitis, 43–44
  biologic mechanisms, 44
  Framingham risk, 40
  healthy diet and exercise plan, 40
  hypercholesterolemia, 40
  infection, 45–46
  inflammation, 46–47
    atheroma enlargement, 42
    cholesterol, 41, 42
    C-reactive protein (CRP), 43
    endothelial cells, 41
    endothelial dysfunction, 41
    extracellular matrix deposition, 42–43
    foam cell formation, 42
    high-density lipoproteins (HDL), 42
    hyperlipidemia, 41
    intracellular non-degraded cholesterol, 42
    lipid accumulation, 41
    low-density lipoprotein (LDL), 42
    matrix metalloproteinases (MMPs), 43
    pro-inflammatory mediators, 41
    smooth muscle cell proliferation, 41, 42
    thrombosis and/or intraplaque hemorrhage, 42
    thrombus formation (embolism), 43
  molecular mimicry, 46
  mortality, 39
  periodontal therapy, 47–48
  prevention, 39
  risk factor, 47
  vascular occlusion, 39

C
Carotid intima-media thickness (CIMT), 48
Centers for Disease Control (CDC), 6
Chlorhexidine (CHX), 87

Chronic kidney diseases (CKD)
end-stage renal disease (ESRD)
causes, 55
incident counts and adjusted rates, 56
incident rate, 55
medical complexity, 54
mortality, 54
periodontitis
management, for CKD patient, 61–62
prevalence and severity, 59–60
risk factor, 60–61
renal hemodialysis, 54
and renal replacement therapies
donor kidneys, 58
glomerular filtration rate (GFR), 54
heparin, 55
histocompatibility leukocyte antigen (HLA) complexes, 57
immune suppression, 58
incident and prevalent patient counts, 56
patient's circulatory system, 55
peritoneal dialysis, 55
renal hemodialysis, 55, 56
transplant survival rates, 58
systemic inflammation, 58–59

D

Diabetes mellitus
advanced glycation end products (AGEs), 30
AGE-RAGE interactions, 28
bacterial burden, 30
bacterial infections, 31
CARE study, 27
categories, 24
chronic periodontal inflammation, 30
classic signs and symptoms, 22
classification, 21
clinical management
dental considerations, 33
medical considerations, 33–34
complication, 25
criteria, 23, 24
cytokine activation, 25
degenerative vascular changes, 30
Diabetes Control and Complications Trials (DCCT), 26
disability and death, 27
DNA analysis, 28
epidemiologic studies, 29
FPG, 23
gestational diabetes mellitus (GDM), 21
HbA1c, 23, 26
high-sensitivity C-reactive protein (hsCRP) levels, 27
hyperglycemia, 25
insulin resistance, 28
insulin therapy, 22
ketoacidosis, 21
ketones, 21
kidney dysfunction, 31
long-term complications, 20
matrix metalloproteinases (MMPs), 30
metabolic syndrome, 24
microvascular and macrovascular complications, 26
monocytic hypersecretory phenotype, 30
motor and sensory nerve conduction velocity, 26
multivariate risk analysis, 29
neuropathy, 26
NHANES III database, 27
NHANES III study, 29
ominous octet, 22
oral changes, 27
oral inflammation, 30
osmotic and oxidative stress, 25
pancreatic autoimmune β-cell destruction, 21
pathophysiological abnormalities, 23
periodontal wound healing, 29
physical activity and dietary changes, 20
prevelance, 20
proteinuria, 31
retinopathy, 29
screening, 22–24
self-monitoring of blood glucose (SMBG), 26
serum CRP levels, 28
therapeutic strategies, 31–32
TNF-α, 31

E

Endothelial dysfunction, 48
End-stage renal disease (ESRD), 31
causes, 55
incident counts and adjusted rates, 56
incident rate, 55

F

Fasting plasma glucose (FPG), 23
Flurbiprofen, 16

G
Genome-wide studies, 9–10
Glucosyltransferase-6 gene, 10
Gram-negative anaerobic species, 2, 117
Gram-negative assacharolytic anaerobic bacteria, 13
Gram-negative cocci and rods, 11

H
High-density lipoproteins (HDL), 42
Hypercholesterolemia, 40

I
Insulin Resistance Atherosclerosis Study (IRAS), 28

L
Low-density lipoprotein (LDL), 42

M
Matrix metalloproteinases (MMPs), 16, 43
Metabolic syndrome, 24

N
Neutrophils, 14
Nod receptors, 12
Non-steroidal anti-inflammatory medications, 16
Nursing-home associated pneumonia (NHAP), 84

O
Oral health and pneumonia
  community-acquired pneumonia
    antibiotics, 82
    bacterial pneumonia, 81
    chest radiography, 82
    clinical symptoms, 82
    etiologic agents, 82
    immunosuppression, 81
    morbidity and mortality, 81
    risk factor, 82
    treatment, 82
  HAP and HCAP
    aspiration pneumonia, 84, 86–88
    nursing-home associated pneumonia (NHAP), 84
    pathogenesis, 84–86

P
Periodontal diseases, 1–3
  classification and prevalence, 6–7
  dental biofilm
    arachidonic acid cascade, 12
    asaccharolytic bacteria, 11
    bone resorption pathways, 13
    exopolysaccharide matrix, 10
    F. nucleatum species, 11
    gingival epithelial cells, 12
    gingival epithelium, 13
    Gram-negative cocci and rods, 11
    Gram-positive aerobic cocci, 11
    Gram-positive aerobic saccharolytic bacteria, 11
    growth factors and metabolites, 10
    host matrix metalloproteinase, 13
    metabolic and nutrient requirements, 11
    Nod receptors, 12
    Peyer's patches, 12
    salivary and bacterial proteins, 11
    scaffold, 10
    toll-like receptors (TLRs), 12
  host subversion
    bystander bacteria, 14
    Gram-negative assacharolytic anaerobic bacteria, 13
    matrix metallo-proteinases, 14
    neutrophils, role of, 14
    peptides and amino acid, 13
    P. gingivalis, 14
  management, 15–17
  pathogenesis, 2
  susceptibility
    chronic adult periodontitis, 8
    clinical significance, 10
    DNA sequence, 9
    gene polymorphisms, 9
    genetic component, 8
    genome-wide studies, 9–10
    gingival inflammation, 9
    gingival vasoconstriction, 8
    glucosyltransferase-6 gene, 10
    risk factors, 7
    single nucleotide polymorphisms, 9
    smoking, 7–8
