## About the Editors

**Todd K. Shackelford** received his Ph.D. in evolutionary psychology in 1997 from the University of Texas at Austin. Since 2010, he is Professor and Chair of the Department of Psychology at Oakland University (<http://www.oakland.edu/psychology>) in Rochester, Michigan, where he is Co-Director of the Evolutionary Psychology Lab ([www.ToddKShackelford.com](http://www.ToddKShackelford.com)). In 2016, he was appointed Distinguished Professor by the Oakland University Board of Trustees. He led the founding of new Ph.D. and M.S. programs (<http://www.oakland.edu/psychology/grad/>), which launched in 2012. Shackelford has published around 300 journal articles and his work has been cited over 22,000 times. Much of Shackelford's research addresses sexual conflict between men and women, with a special focus on men's physical, emotional, and sexual violence against their intimate partners. Since 2006, Shackelford has served as Editor of the journal *Evolutionary Psychology* ([www.epjournal.net](http://www.epjournal.net)) and in 2014 founded the journal *Evolutionary Psychological Science* (<http://www.springer.com/psychology/personality+%26+social+psychology/journal/40806>) as Editor-in-Chief.

**Viviana A. Weekes-Shackelford** received her Ph.D. in evolutionary developmental psychology in 2011 from Florida Atlantic University. She currently teaches at Oakland University and is Co-Director of the Evolutionary Psychology Lab, along with her colleague and spouse Todd K. Shackelford. Her research over the years has been evolutionarily inspired and has had the broader goal of gaining a more comprehensive understanding of violence and conflict in families and romantic relationships. Her research interests and publishing record cut across the psychological domains of forensics, development, social, personality, clinical, and criminology. She teaches courses such as psychology of gender, evolutionary psychology, research methods, and statistics. Her most recent endeavor includes creating a podcast/YouTube channel (Darwinian Diva) that aims to reach beyond the walls of academia to share her passion for scientific exploration, to reinvigorate those already on the scientific exploration train, whether it's academics, grad students, undergrad students, other curious minds, and to lure in newbies that are looking for a new way of thinking about topics ranging from romantic relationships to parent/child relationships, from birth control to sexual control, and from the foods that satiate us to the thoughts that stimulate us.
