

Lecture Notes in Civil Engineering

Volume 133

Series Editors

Marco di Prisco, Politecnico di Milano, Milano, Italy

Sheng-Hong Chen, School of Water Resources and Hydropower Engineering,
Wuhan University, Wuhan, China

Ioannis Vayas, Institute of Steel Structures, National Technical University of
Athens, Athens, Greece

Sanjay Kumar Shukla, School of Engineering, Edith Cowan University, Joondalup,
WA, Australia

Anuj Sharma, Iowa State University, Ames, IA, USA

Nagesh Kumar, Department of Civil Engineering, Indian Institute of Science
Bangalore, Bengaluru, Karnataka, India

Chien Ming Wang, School of Civil Engineering, The University of Queensland,
Brisbane, QLD, Australia

Lecture Notes in Civil Engineering (LNCE) publishes the latest developments in Civil Engineering - quickly, informally and in top quality. Though original research reported in proceedings and post-proceedings represents the core of LNCE, edited volumes of exceptionally high quality and interest may also be considered for publication. Volumes published in LNCE embrace all aspects and subfields of, as well as new challenges in, Civil Engineering. Topics in the series include:

- Construction and Structural Mechanics
- Building Materials
- Concrete, Steel and Timber Structures
- Geotechnical Engineering
- Earthquake Engineering
- Coastal Engineering
- Ocean and Offshore Engineering; Ships and Floating Structures
- Hydraulics, Hydrology and Water Resources Engineering
- Environmental Engineering and Sustainability
- Structural Health and Monitoring
- Surveying and Geographical Information Systems
- Indoor Environments
- Transportation and Traffic
- Risk Analysis
- Safety and Security

To submit a proposal or request further information, please contact the appropriate Springer Editor:

- Pierpaolo Riva at pierpaolo.riva@springer.com (Europe and Americas);
- Swati Meherishi at swati.meherishi@springer.com (Asia - except China, and Australia, New Zealand);
- Wayne Hu at wayne.hu@springer.com (China).

All books in the series now indexed by Scopus and EI Compendex database!

Preface

The Indian Geotechnical Society, Surat Chapter, and Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India, organized the Indian Geotechnical Conference (IGC) in Surat during 19–21 December 2019. The main theme of the conference was “GeoINDUS: Geotechnics for INfrastructure Development and UrbaniSation”. The sub-themes of the conference included:

1. Characterization of Geomaterials and Physical Modelling
2. Foundations and Deep Excavations
3. Soil Stabilization and Ground Improvement
4. Geoenvironmental Engineering and Waste Material Utilization
5. Soil Dynamics and Earthquake Geotechnical Engineering
6. Earth Retaining Structures, Dams and Embankments
7. Slope Stability and Landslides
8. Transportation Geotechnics
9. Geosynthetics Applications
10. Computational, Analytical and Numerical Modelling
11. Rock Engineering, Tunnelling and Underground Constructions
12. Forensic Geotechnical Engineering and Case Studies
13. Others Topics: Behaviour of Unsaturated Soils, Offshore and Marine Geotechnics, Remote Sensing and GIS, Field Investigations, Instrumentation and Monitoring, Retrofitting of Geotechnical Structures, Reliability in Geotechnical Engineering, Geotechnical Education, Codes and Standards and other relevant topics.

The proceedings of this conference consists of selected papers presented at the conference. The proceedings is divided into six volumes, including a special volume with all keynote/invited presentations.

We sincerely thank all the authors who have contributed their papers to the conference proceedings. We also thank all the reviewers who have been instrumental in giving their valuable inputs for improving the quality of the final papers. We greatly appreciate and thank the student volunteers, especially Vemula Anand Reddy, Mohit Mistry, Rahul Pai, Manali Patel, Rohan Deshmukh, Hrishikesh Shahane, Anand M. Hulagabali, Jiji Krishnan and Bhavita Dave, for their unwavering support that was instrumental in preparation of this proceedings. Finally, thanks to the Springer team for their support and full cooperation for publishing six volumes of this IGC-2019 proceedings.

Contents

Behaviour of Geosynthetics Clay Liner Under Direct Shear Test	1
Aditya Kumar Bhoi, Sunil Kumar Ahirwar, and Jnanendra Nath Mandal	
Effect of Saturation and Cementation on the Stiffness of Gypsiferous Soils	13
Raghava A. Bhamidipati, Michael E. Kalinski, and L. Sebastian Bryson	
Experimental Evaluation of Bearing Capacity of Single CFG Pile	23
N. B. Umrvavia and C. H. Solanki	
Comparison Between Casagrande Method and Cone Penetrometer Method for Determination of Liquid Limit of Soil	39
Preksha Jain, Jennie Gandhi, Sudhir Trivedi, and Rajesh P. Shukla	
Predictive Models for Estimating the Coefficient of Permeability for Sands	49
Indra P. Acharya, Anubhav, and Prabir K. Basudhar	
Geotechnical Characterization and Mineralogical Evaluation of Soils in Srinagar City, Jammu and Kashmir	59
Falak Zahoor, K. Seshagiri Rao, Mohd Younis Hajam, Irfan Ahmad Kumar, and Hilal Ahmad Najjar	
Determination of Volumetric Shrinkage of Soils by Dish Method	73
Sanjay Kumar Verma, Sagar Shrivastava, Saleem Akhtar, and Rajesh Bhargava	
Comparison Between the Soil Properties of the Coastal and Interior Regions of Gujarat	83
Param Shah and Manas Kumar Bhoi	
Effect of Plastic Fines on Geotechnical Behavior of Ennore Sand	99
Sagarkumar Khunt and Ajanta Sachan	
Effect of Relative Density on Elastic Properties of Sand	107
Arpita V. Patel and Nitin H. Joshi	

Characterization and Stabilization of Red Mud and Ash—Solid Industrial Waste from Aluminum Industry	119
A. Ghosh, Dalip Kumar, and Zamir Ahmaed	
A Study on Effect of Mica Content on Engineering Properties of Sands	131
Rajesh Deb and Indira Baruah Gogoi	
Study of Thermal Conductivity of Soils for Varying Density and Water Content Profiles	143
Pooja Bhojani, L. S. Thakur, and D. L. Shah	
Electrical Resistivity Tomography in Geotechnical Engineering Applications	157
Deepak Sagar, S. B. Dwivedi, and Prabir K. Basudhar	
Analysis of Physical Modeling of Cast-In-Situ Concrete Piled Raft	169
J. M. Raut, S. R. Khadeshwar, and S. P. Bajad	
Assessment of 3D Consolidation Settlement of Soil by Considering the Effect of Surcharge Pressure	181
Arpan Laskar and Sujit Kumar Pal	
Compaction Characteristics of Red Earth and Quarry Dust Combinations	191
Neba C. Tony, G. Devdas, Sandra G. Raj, and Renjitha Mary Varghese	
Effect of Placement Moisture Content on Swelling–Shrinkage Behaviour of Expansive Soil	203
Arshad K. Siddiqui and Trudeep N. Dave	
Foundation Bearing Capacity Estimation on Rock-Mass Using Hoek–Brown Failure Criterion and Equivalent Mohr–Coulomb Parameters	213
Shikhar Prakash, Dhiraj Raj, and Yogendra Singh	
Carrying Capacity of Model Steel Pile Foundation with Different Cross-Sectional Shapes in Sand	225
Khushal Paliwal, Nitin H. Joshi, and Pooja Bhojani	
An Experimental Study of the Piled Raft Foundation Subjected to Combined Vertical and Lateral Load	237
Uttam Kumar and Sandeep A. Vasanwala	
Bell-Shaped Anchor with Geotextile Ties Embedded in Clay—A Numerical Study	249
Arya Das and Ashis Kumar Bera	
Studies on Tilt of Closely Spaced Strip Footings on Unreinforced and Reinforced Sands	263
S. Anaswara and R. Shivashankar	

Experimental Evaluation of Failure Zone in Sand Beneath the Ring Footing and Cutting Edge of Open Caisson Using Image Analysis 273
 Jitesh T. Chavda and G. R. Dodagoudar

Influence of Soil Variability in SPT Data for Predicting the Bearing Capacity of Piles 285
 Kotra Saikumar and Kaustav Chatterjee

Nonlinear Analysis of Laterally Loaded Pile Group in Layered Soil–Ash Deposit 297
 Amit Kumar Ram and Supriya Mohanty

Rationalization of LRFD Method for Safe Bearing Capacity of Shallow Footings to Incorporate the Type of Shear Failure 311
 Ronak Kotadia, K. N. Sheth, and Avani Malaviya

Case Study on Underpinning of Foundation for an Industrial Building Renovation 323
 A. Karthikeyan

Evaluation of WSM, LRFD and FE Methods for Pile Capacity Calculation with Pile Load Test for IGM 335
 Pratik V. Shah and Kandarp K. Thaker

Analysis and Design of Micro-pile Foundation for an Extension of a Commercial Building 349
 Rutuj Chheda, Atharva Pisolkar, Chhaya Kandpal, Jigisha Vashi, Aditya Soni, and Rishabh Bakliwal

Experimental and Numerical Investigation of Combined Batter Pile–Raft Foundation Embedded in Sand 357
 M. Mahalakshmi, B. Soundara, and C. D. Hashini

An Analytical Parametric Study on Behaviour of Flexible Raft Foundation 365
 Pritam Sinha, Ram Wanare, Parish Dalal, and Kannan K. R. Iyer

A Case on Engineered Solution for Deep Excavation in Restricted Space 375
 Ajitkumar Kumbhar, Rajay Balwan, and Girish Gokhale

Response of Laterally Loaded Monopile Using Three-Dimensional Finite Element Analysis 383
 Jithin P. Zachariah and Jagdish Prasad Sahoo

Influence of Combined Vertical and Lateral Loading on Lateral Response of Piled Raft Foundation 395
 Plaban Deb and Sujit Kumar Pal

Interpretation of Load-Settlement Curves from Graphical Methods 407
 Naga Sireesha Ghanta and Sujit Kumar Pal

Behavior of Rigid Footing Rested on a Group of Stone Column	417
Mrinal Bhaumik, Suresh Prasad Singh, and Megha Biswas	
Design and Construction of Rock Socketed Pile Foundation for Bridges—Case Study on Road Project in Madhya Pradesh, India ...	429
Avik Kumar Mandal, S. Sailesh, and Pradyot Biswas	
Evaluation of Bearing Capacity of Ground in Transition Zone	451
Sreevar Ramesh, R. V. Suman, M. Yashwanth, and S. K. Prasad	
Behavior of Rectangular and T-Shaped Diaphragm Wall Panels in Mixed Soil Conditions: A Case Study	461
C. Vimala and Madan Kumar Annam	
Bearing Capacity of Eccentrically Loaded Circular Footing Supported on Reinforced Sand	471
Srikalpa Rajguru Mahapatra and Rupashree Ragini Sahoo	
Seismic Bearing Capacity of Shallow Footing in Layered Soil	487
Smita Tung, Sibapriya Mukherjee, Narayon Roy, and Somenath Mukherjee	
Ground Improvement by Granular Anchor Pile Foundation in Cohesive Soil Under Axial Pullout Loads	501
Heena Malhotra and Sanjay Kumar Singh	
Seismic Bearing Capacity of Strip Footing Embedded in Slope Situated Below Water Table	513
Litan Debnath, Rohan Deb, Prasanta Das, and Sima Ghosh	
Study on Piles Subjected to Axial and Lateral Loading	527
V. K. Stalin, A. Priyadarshini, P. Deepan, and A. Abudaheer	
Experimental Study of Pile Resting on Sloping Ground Subjected to Cyclic Lateral Loading	543
Dinesh Bishnoi, M. Upendra, and Jignesh B. Patel	
A Study of Piled Raft Foundation	557
Riddhi M. Gupta, Jaykumar C. Shukla, and Nitin H. Joshi	
Seismic Stability of Unsupported Conical Excavation in Clayey Ground	571
Dhiraj Raj, M. Bharathi, and Sanjay K. Shukla	
Analysis of Settlement Induced by Dissipation of Excess Pore Water Pressure Due to Piling in Soft Clay at Haldia	583
Akanksha Kesharwani, Abhijeet Gupta, and Ashok Kumar Khan	
Performance Evaluation of Piles for Slope Reinforcement	595
Dinesh Kumar Malviya, Ganesh Kumar, and Madan Chandra Maurya	

Stability Analysis of Soil Slopes Subjected to Foundation Loads During Earthquakes 605
 Sukanta Das and B. K. Maheshwari

Probabilistic and Deterministic Analysis of Lungchok Landslide, South Sikkim, India 615
 Neharika Rao Ganta and Neelima Satyam

Experimental Study of Ugat Canal Soil for Slope Stability 623
 Yati R. Tank, Ashika S. Patel, Pratima A. Patel, and Akhilesh R. Tank

Pseudo-static Stability Analysis of Multilayered Slopes Using Sarma’s Method of Non-vertical Slices 635
 Somenath Mukherjee, Subhadeep Metya, and Gautam Bhattacharya

A Study on the Erodibility of Lateritic Soil Due to Flooding 649
 Zoheb Faisal, P. Muhammed Shibil, P. K. Jayasree, and J. Jayamohan

Experimental Investigations on Rainfall-Induced Landslides 659
 Ganesh Kumar, Shantanu Sarkar, Mayank Gupta, and Priyanka Devi

Study on Stability Analysis of South Bank of River Brahmaputra and Its Tributaries in the Reaches of Upper Assam 667
 Khagana Buragohain and P. K. Khaund

Analysis of Rainfall-Induced Shallow Slope Failure 679
 Tehseena Ali, Himanshu Rana, and G. L. Sivakumar Babu

Slope Stability Analysis of an Earthen Dam Using GEOSTUDIO 2007 Software 693
 Saurav Shekhar Kar and L. B. Roy

Static and Dynamic Analysis of Nailed Slope 705
 Chappidi Srinivas and M. Padmavathi

Design and Analysis of Earth Slopes Using Geosynthetics 719
 N. Vijay Kumar, S. S. Asadi, D. Satish Chandra, A. Shivamant, and G. Pradeep Kumar

Stability Analysis of Slope in Kuranjeri During Kerala Flood 2018 Using PLAXIS-3D 731
 Lakshmi Manohar and A. K. Vasudevan

Generalized Three-Dimensional Slope Stability Analysis of Soil Using Plaxis 3D 745
 P. M. Shafna and T. R. Anjana

Stability Assessment of a Soil Slope in Meghalaya, North-Eastern India 753
 Antareep Kumar Sarma, Ashesh Choudhury, Koustavjit Sarma, and Anangsha Alammyan

Assessment of an Open Cast Coal Mine Slope Stability at Mohanpur Block, Raniganj Coalfield, West Bengal, India 765
Agami Pramanik, Avishek Adhikary, and Supriya Pal

A Numerical Study on Geotextile-Reinforced Slopes 775
Hardik V. Gajjar and Veerabhadra M. Rotte

About the Editors

Dr. Satyajit Patel is Associate Professor at the Civil Engineering Department, Sardar Vallabhbhai National Institute of Technology, Surat, India. His research area includes utilization of industrial solid wastes in civil engineering constructions, geoenvironmental issues, soil stabilization, ground improvement, and geosynthetics for road pavements. He has published 13 journal papers and presented 7 research papers internationally. He has guided more than 29 M.Tech. students and 9 students are currently pursuing their Ph.D. under his guidance. He is a life member of Indian Geotechnical Society, Institution of Engineers (India), and Indian Road Congress (IRC). He has received a research grant from the Department of Science and Technology, Government of India.

Dr. C. H. Solanki is Professor (Geotechnical Engineering) at the Civil Engineering Department, Sardar Vallabhbhai National Institute of Technology, Surat, India. He has guided 50 postgraduate dissertations and 16 Ph.D. thesis and he is currently supervising 11 Ph.D. research scholars. He has published 165 research papers in the reputed national, international journals and conferences. Dr. Solanki received the “Shri. M. S. Jain Biannual Award” for the Best Paper in IGC 2013, Prof. Dinesh Mohan Award in IGC 2017 and “Distinguished Faculty Award” form The Venus International Faculty Awards-2016. He has organized 20 national level events including STTP, FDP, conferences and seminars and he was the chairman for the Indian Geotechnical Conference (IGC 2019) held at Surat, Gujarat. Dr. Solanki has been elected as a member

of executive committee of IGS for the terms (2015–2022). His research interests include subsoil characteristics, predictions in geotechnical engineering, soil dynamics, ground improvement and geoenvironmental engineering. He has given 50 expert talks throughout India and abroad. He is a life member of Indian Geotechnical Society, Indian Society for Technical Education (ISTE), and Institution of Engineers (India).

Dr. Krishna R. Reddy is Professor of Civil and Environmental Engineering, Director of Sustainable Engineering Research Laboratory, and also Director of the Geotechnical and Geoenvironmental Engineering Laboratory at the University of Illinois at Chicago, USA. He received his Ph.D. in Civil Engineering from the Illinois Institute of Technology, Chicago, USA. Dr. Reddy has over 28 years of teaching, consulting, and research experience in the fields of civil engineering, geotechnical and geoenvironmental engineering, environmental engineering, and sustainable and resilient engineering. He is the author of 4 books, 246 journal papers, 21 edited books/conference proceedings, 22 book chapters, and 225 full conference papers. He has received several awards for excellence in research and teaching, including the ASCE Wesley W. Horner Award, ASTM Hogentogler Award, UIC Distinguished Researcher Award, the University of Illinois Scholar Award, and the University of Illinois Award for Excellence in Teaching.

Dr. Sanjay Kumar Shukla is the Founding Research Group Leader (Geotechnical and Geoenvironmental Engineering) at the Edith Cowan University, Perth, Australia. He is the Founding Editor-in-Chief of the International Journal of Geosynthetics and Ground Engineering. He holds the Distinguished Professorship in Civil Engineering at Delhi Technological University, Delhi, VIT University, Vellore, Amity University, Noida, Chitkara University, Himachal Pradesh and V. R. Siddhartha Engineering College, Vijayawada, India. He graduated in Civil Engineering from BIT Sindri, India, and earned his M.Tech. in Civil (Engineering Geology) Engineering and Ph.D. in Civil (Geotechnical) Engineering from the Indian Institute of Technology (IIT) Kanpur, India. His primary areas of research interest

include geosynthetics and fibres for sustainable developments, ground improvement techniques, utilization of wastes in construction, earth pressure and slope stability, environmental, mining and pavement geotechnics, and soil–structure interaction. He is an author/editor of 15 books, including 7 textbooks, and more than 260 research papers, including 160 refereed journal papers. He has been honoured with several awards, including IGS Award 2018 by the International Geosynthetics Society, USA, in recognition of outstanding contribution to the development and use of geosynthetics. He is a fellow of Engineers Australia, Institution of Engineers (India), and Indian Geotechnical Society, and a member of American Society of Civil Engineers, International Geosynthetics Society, and several other professional bodies.
